 **README.md**

Pico CTF 2014 : The Valley Of Fear

Category: Crypto **Points:** 20 **Description:**

The hard drive may be corrupted, but you were able to recover a small chunk of text. Scribbled on the back of the hard drive is a set of mysterious numbers. Can you discover the meaning behind these numbers? (1, 9, 4) (4, 2, 8) (4, 8, 3) (7, 1, 5) (8, 10, 1)

Hint:

Might each set of three numbers represent a word in a message?

Write-up

The hint tells us that each of these three numbers might represent a word in a message.

We are given 9 paragraphs in [book.txt](#) with up to 17 lines for each sentence and quickly discover that each triple uses following scheme to encodes/hide a word:

```
(1, 9, 4) == (paragraph, line-in-paragraph, word-in-line) == 4th word in 9th line of first paragraph
```

That means we get following words:

```
(1, 9, 4) == the
(4, 2, 8) == flag
(4, 8, 3) == is
(7, 1, 5) == Ceremonial
(8, 10, 1) == plates
```

The flag is Ceremonial plates .
